Title: Notes on the Void

Author: Vienne

A terrible place of
darkness, it has the
terrible cold unlike
any it goes not the the
bone. (probably the
after affect of the
void, left over negative
energy on the subject)
Many shapes circling
about in the void, they
were almost like
wolves (proably souls
of the dead).

The one know as gwen
was able to command
these spirit things.

There is only one land
mark a light. you can
walk towards it for
ever but never reach
it.

Accessing hte void:
Its sound like Dell was
teleported into the
Void.

Leaving the void:

Once again
teleportation.

The Kindred seem to
be able to perceive the
void as humans the
ether. Must be their

altered perception.
Don will need a guide
within the void. since
there are no land
marks of any kind.
and he must be able to
get out.
The spirits in the void
cannot abide love, you
can use this as an
anchor to the real
world.
